CALL FOR PAPERS

The ICP 2017 : 19th International Conference on Photochemistry is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Photochemistry. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Basic photochemistry (energy and electron transfer, H-bonding, solvation dynamics, aggregates,...)
norganic and theoretical photochemistry (qdots, lanthanide spectroscopy, inorganic probes, theory and modelling,...)
Labels (fluorescent proteins, photochromics, photoswitches, novel organic probes,...)
Novel developments in spectroscopy and microscopy (super resolution microscopy, biomedical microscopy, non-linear spectroscopy/microscopy,

correlative microscopy,...)
Single molecule spectroscopy (single molecule biophysics, single molecule (photo)chemistry,...)
Photochemistry in Biology (singlet oxygen, phototherapy, biophysics,...)
Photochemistry in polymers and material science (spectroscopy in confined space, polymer (photo)chemistry and spectroscopy,...)
Photochemistry in sustainable technology (photovoltaics, photocatalysis, green photochemistry, environmental and atmospheric
